NOVAFLUX

Automation without manual busywork

A digital workflow management concept

PRODUCT DECK

CONTEXT

Manual handoffs slow work down

Concept deck. The scenarios shown are illustrative, not real client results.

01 **Request received**

Email, form or spreadsheet

02 **Data copied**

A team member copies fields manually

03 **Status unclear**

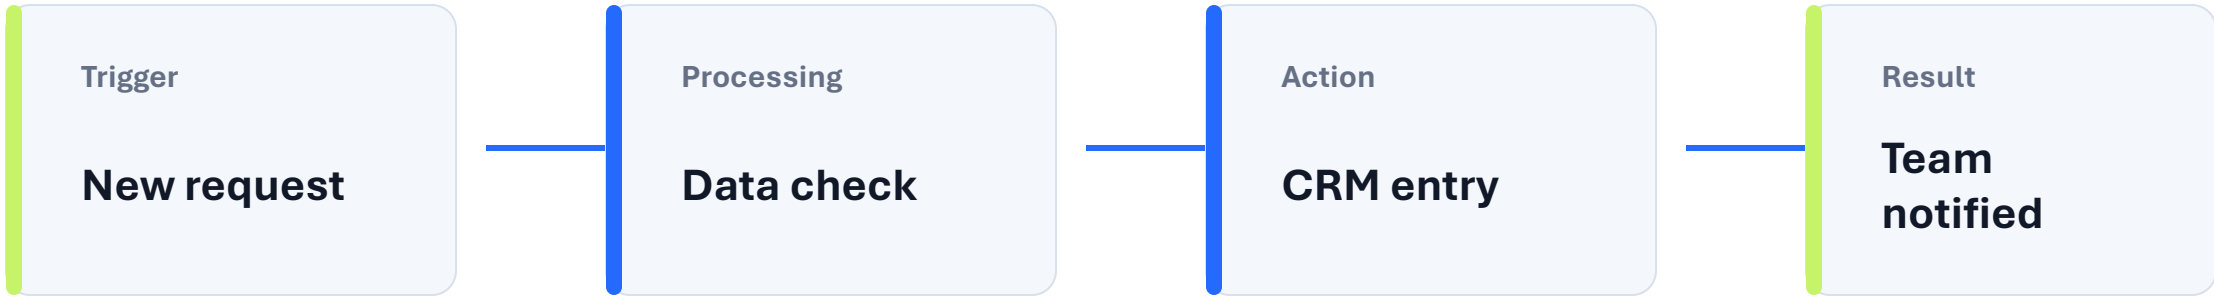

The team checks who is responsible

One missed step is enough

As requests grow, manual steps cause delays and rework. NOVAFLUX brings the flow into one path.

A clear visual workflow

Connect steps, set conditions and see the outcome.

Each step stays editable. Errors appear at the relevant node; reruns need no rebuild.

FEATURES

Four everyday features

01 Workflows

Visual steps and conditions

02 Integrations

Connect forms, email and CRM

03 Monitoring

Run history and step status

04 Retry

Retry from an error without restarting

LAUNCH

Pilot one repeatable workflow

Start with a clear input, owner and measurable outcome.

1

Choose a workflow

One frequent task

2

Build the flow

Steps and owners

3

Testing

Check for errors

4

Expand

More teams and integrations

Pilot success: the team completes the flow without manual data transfers.

One workflow, fewer manual steps

Product concept ready for demos, workflow testing and UI refinement.
